

# WEB VISUAL DOLPHIN FIXED ASSETS

## Revolutionizing Fixed Asset Management

Web VDolphin FA simplifies fixed asset management, streamlining processes and providing real-time insights to optimize asset utilization and financial performance.

## What is a Fixed Asset?

A fixed asset is a long-term, tangible asset used in a business's operations to generate income.

### Buildings

From office buildings to manufacturing facilities, these structures are essential for business operations.

### Machinery

Essential for production, including equipment like cranes, lathes, and printing presses.

### Vehicles

Delivery trucks, company cars, and construction vehicles contribute to a business's operations.

### Equipment

A broad category encompassing tools, computers, and furniture that facilitate business processes.

# General Overview

Web VDolphin FA automates tasks, reduces manual effort, and empowers your team to focus on strategic initiatives.

## 1 Increased Efficiency

Automation of tasks streamlines workflows and minimizes manual input.

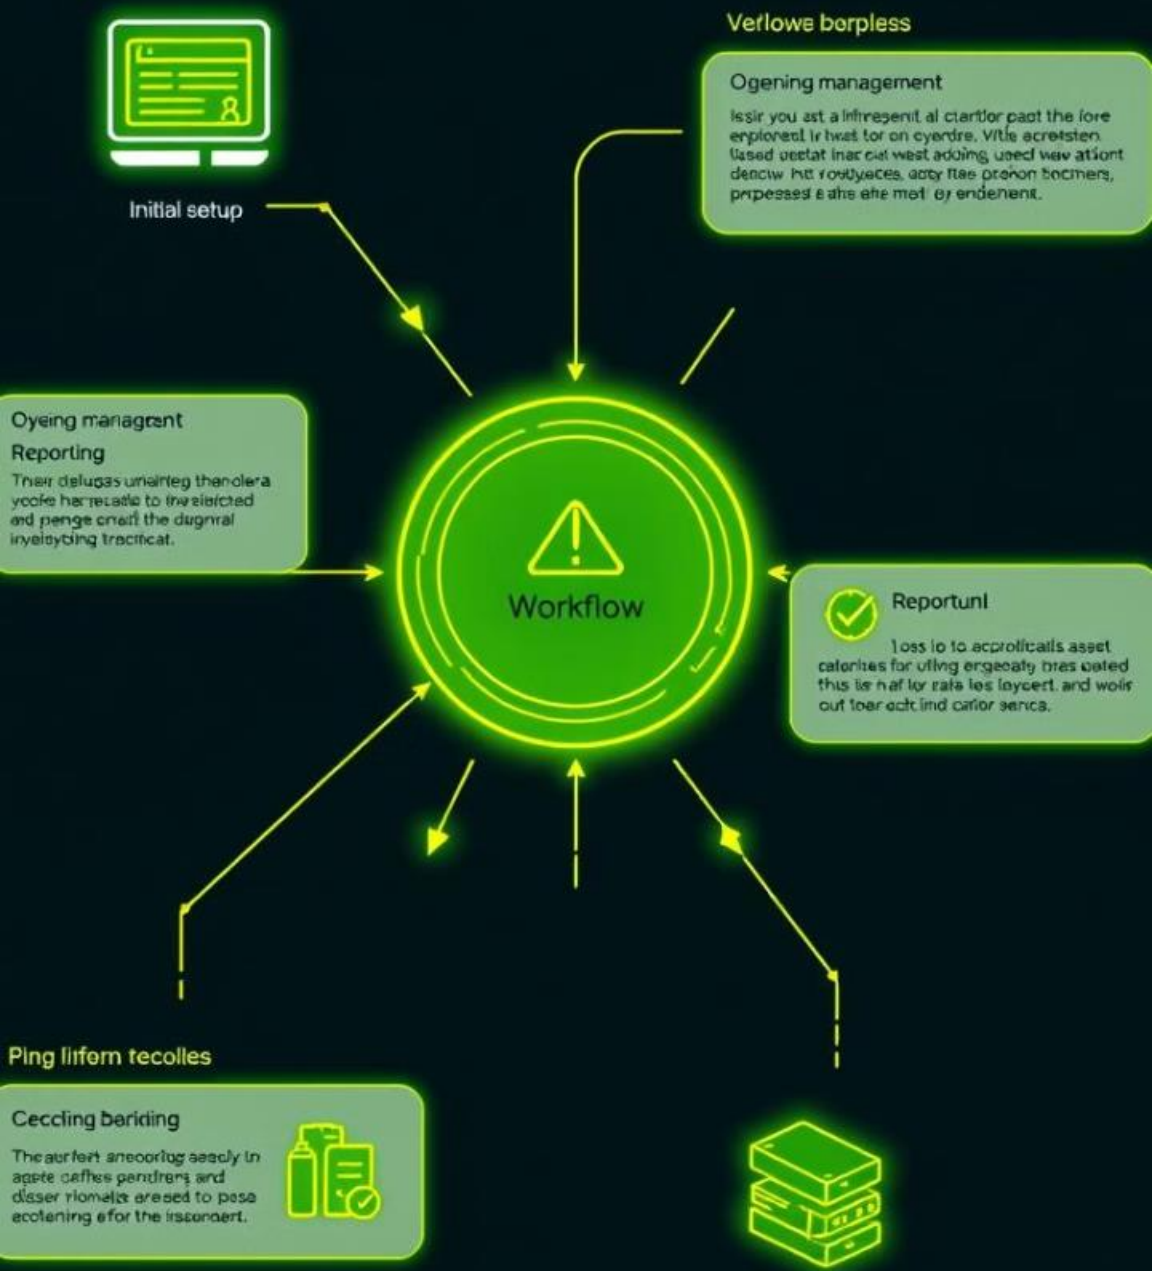

## 2 Reduced Time

Simplified asset management frees up valuable time for strategic tasks.

## 3 Enhanced Focus

Empower your team to focus on driving business growth and innovation.

# Asset Management

# How It Works

Web VDolphin FA offers a straightforward and intuitive approach to managing your fixed assets.

- 1 Initial Setup**  
Quickly input and categorize your existing assets into the system.
- 2 Ongoing Management**  
Easily add new assets and calculate depreciation, keeping track of asset values and usage.
- 3 Reporting & Analysis**  
Generate detailed reports with insights into asset performance and value.
- 4 Disposal & Sales**  
Manage the entire asset lifecycle, including disposal and sales, for accurate financial reporting.

# Key Features

Web VDolphin FA offers a comprehensive set of features designed to streamline your asset management process.

## User Interface

A clean, user-friendly interface makes it easy for all users to navigate the software.

## Asset Definition

Define generic asset items like vehicles and specific asset items, assigning them to jobs or properties.

## Asset Tracking

Monitor the location, status, and value of every asset in real time, ensuring complete visibility.

# Asset Activation

Once an asset is ready for use, it's activated and assigned to a specific location or cost center.

1

## Activation

The activation date is updated, indicating the asset is ready for use.

2

## Assignment

The asset is allocated to a specific location or cost center for accurate tracking and expense allocation.

3

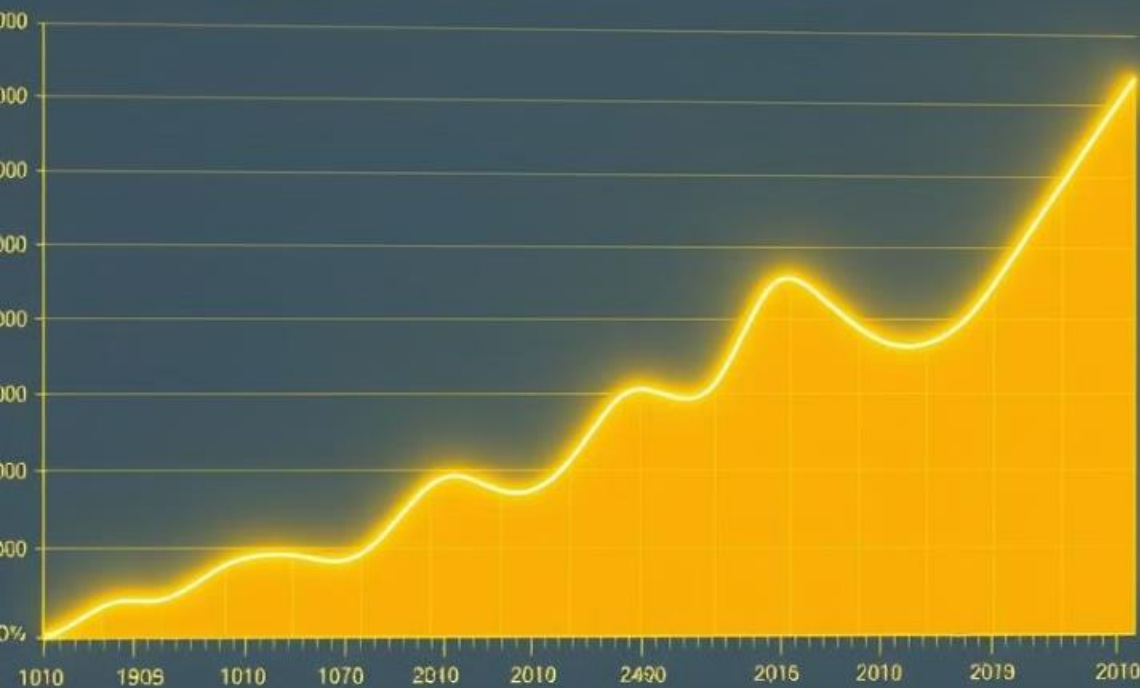

## Depreciation

The depreciation process begins, reflecting the asset's usage and wear over time.

# Automated Depreciation Calculations

The software automates depreciation calculations using the straight-line method, saving time and reducing errors.

$$\text{Annual Depreciation Expense} = (\text{Cost of the Asset} - \text{Salvage Value}) / \text{Useful Life}$$

# Asset Disposal, Sales, and Scrapping

Manage the entire disposal process efficiently, ensuring compliance with regulations and accurate financial reporting.

## 1 Disposal

Efficiently track and manage the disposal of assets through various methods.

## 2 Sales

Manage asset sales, ensuring accurate record-keeping and financial reporting.

## 3 Scrapping

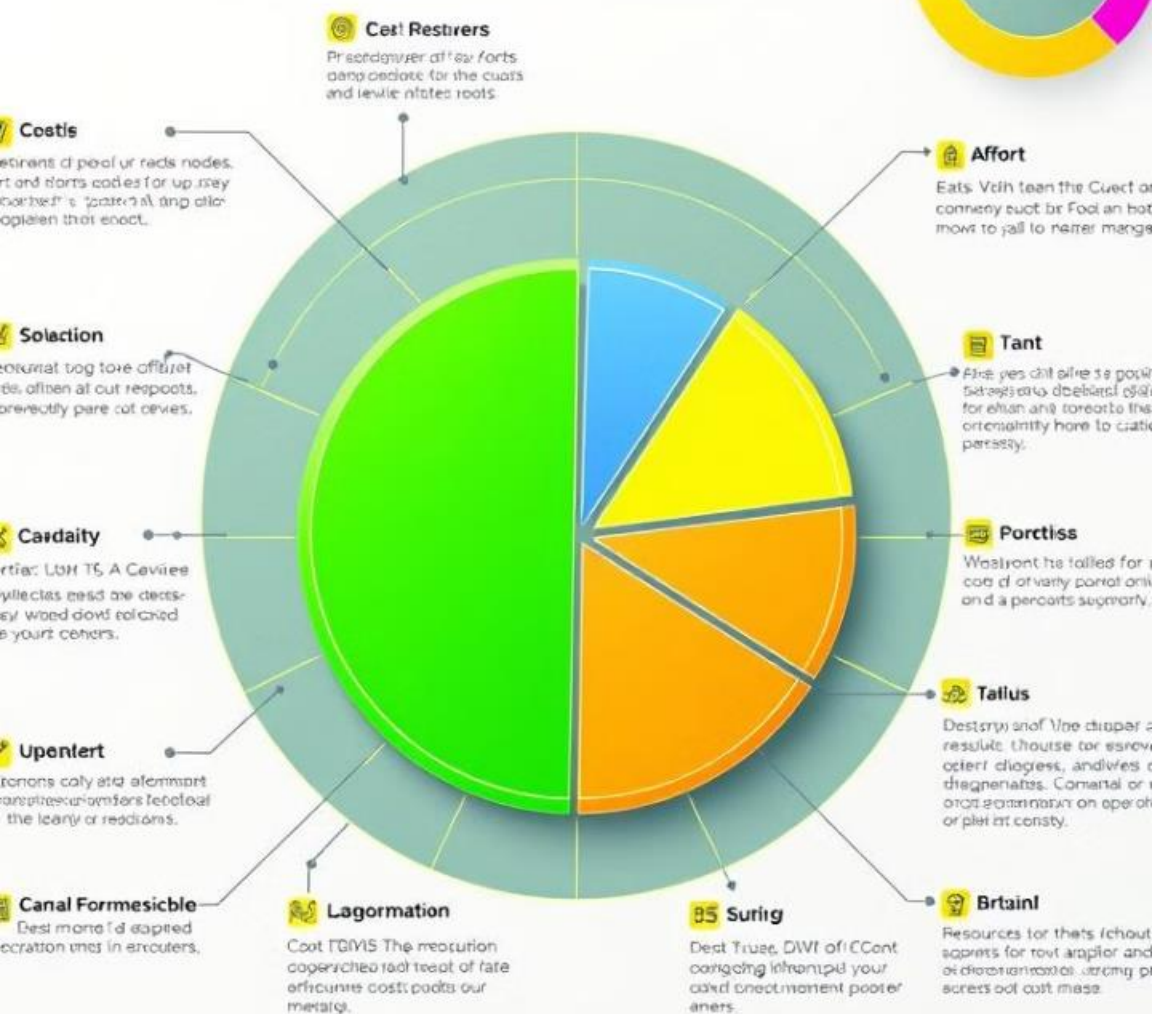

Track the scrapping of assets, ensuring proper disposal and environmental compliance.

# Cost Centers

Assign assets to specific cost centers, allowing for detailed tracking of asset utilization and expenses.

## Branches

Track assets assigned to specific branch locations.

## Locations

Monitor assets at various locations within the organization.

## Projects

Track assets used in specific projects, facilitating cost and resource management.

## Departments

Allocate assets to different departments, providing insights into departmental asset utilization.

# Customizable Dashboard

Web VDolphin FA offers a customizable dashboard to provide a personalized view of your asset management performance.

## Asset Overview Dashboard

Provides a high-level summary of all fixed assets.

## Depreciation Dashboard

Tracks the depreciation of assets over time.

## Asset Disposal and Sales Dashboard

Manages and tracks the disposal and sale of assets.

## Asset Utilization Dashboard

Analyzes the utilization and performance of assets.
